The invention relates to inducing an immune response against Helicobacter in a mammal, comprising mucosally administering to the mammal an attenuated Salmonella vector containing a nucleic acid molecule encoding a Helicobacter antigen, and parenterally administering to the mammal a Helicobacter antigen, and parenterally administering to the mammal a Helicobacter antigen. Also included is an attenuated Salmonella vector comprising a nucleic acid molecule encoding a Helicobacter antigen. The Helicobacter antigen is a urease, a urease subunit, or its immunogenic fragment (encoded by the ureA and ureB genes). The mammal is at risk of having but does not have Helicobacter infection or has a Helicobacter infection. The attenuated Salmonella vector further comprises an htrA or nitB promoter. The vector can be used in inducing an immune response against Helicobacter in ammmal. The vector can be used to treat
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Helicobacter infection. The vector and the method can be used to treat Helicobacter infection. The vector and the method can be used to treat Helicobacter induced gastroduodenal diseases, including acute, chronic or atrophic gastritis, peptic ulcer diseases (e.g. gastric or duodenal ulcers), and gastric carcinoma. Attenuated Salmonella vector pHUR3 was constructed expressing UreA and UreB and including an E. coli AmpR gene. The present sequence represents the pHUR3 plasmid. NOTE: pHUR3 is represented by both AEB55112 and AEB55130, the peptides expressed by pHUR3 are shown in the sequence listing to be split between AEB55112 and AEB55130, yet Figure 4 shows all the peptides being expressed by the one
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 an immune response against Helicobacter in mammals, useful for
Helicobacter induced gastroduodenal diseases.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           P-PSDB; AEB55113, AEB55114, AEB55115, AEB55116, AEB55117, AEB55118, AEB55119, AEB55120, AEB55122, AEB55123, AEB55124, AEB55125, AEB55126, AEB55127, AEB55129, AEB55111, AEB55137, AEB55134, AEB55134

comprising mucosally administering to the mammal an attenuated Salmonella vector containing a nucleic acid molecule encoding a Helicobacter antigen. Also included is an attenuated Salmonella vector comprising a nucleic acid molecule encoding a Helicobacter antigen. Also included is an attenuated Salmonella vector comprising a nucleic acid molecule encoding a Helicobacter antigen. The Helicobacter antigen is a urease subunit, or its immunogenic fragment (encoded by the ureB ganes). The mammal is at risk of having but does not have Helicobacter infection or has a Helicobacter in infection. The vector can be used in inmune response against Helicobacter in a mammal. The vector can be used to treat Helicobacter induced gastroduodenal diseases, including acute, chronic or atrophic gastric orcaciona. Attenuated Salmonella vector pHUR3 was constructed expressing UreA and UreB and including an E. coli AmpR gene. The present sequence represents the PHUR3 plasmid. NOTE: PHUR3 is constructed expressed by putMIR3 are shown in the sequence listing to be split between AEB55112 and AEB55130, the peptides expressed by the one SEQUENCE, therefore all encoded peptides are cross-referenced to both
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     'n

                                                                                                                                                                                                                                                                                 The DNA is a 2.7 kb TaqI fragment encoding the A and B subunits of H. pylori (previously C. pylori) urease, i.e. the 66 and 31 kb antigens. From the sequence, probes and primers can be designed for the manification (by PCR) of the gene, to produce a prods. common to all H. pylori strains so far tested and which do not occur in other ureases and can therefore be used as a specific indication of the presence of H. pylori. H. pylori (previously C. pylori) is strongly implicated in the pathogenesis of gastritis and duodenal and peptic ulceration in man. The primers/probes can be used for the detection of H. pylori DNA in gastric mucosa, saliva or faecal samples to provide an early diagnosis of infection. See also AAQ12434-Q12486. ```

The invention relates to an isolated nucleic acid molecule conferring on Helicobacter bizzozeronii an ability to produce urease, where the nucleic acid molecule is a urease gene cluster comprising at least one urease structural gene and at least one urease accessory gene. The nucleic acid molecule is chosen from ureb, ureb, ureb, ureb, urec, ured, ured, ured and urel. The invention also relates to an isolated protein encoded by the nucleic bizzozeronii comprising a nucleic acid and a carrier and an isolated antibody or its binding portion raised against the nucleic acid. The nucleic acid, proteins and antibodies are useful for vaccinating mammals against onset of disease caused by infection of H. bizzozeronii, which

involves administering the sequences. The sequences are useful for detecting H. bizzozeronii in a sample of tissue or body fluids which mivolves providing a nucleic acid as an antigen, providing an antibody, or providing a nucleotide sequence as a probe in a nucleic acid hybridisation assay, contacting the sample with the antigen or the probe, and detecting any reaction which indicates that H. bizzozeronii is present in the sample. This sequence represents H. bizzozeronii ureB DNA.

Sequence 1710 BP; 492 A; 436 C; 386 G; 396 T; 0 U; 0 Other;

Novel isolated nucleic acid molecule having urease gene cluster, and conferring on Helicobacter bizzozeronii ability to produce urease, useful as vaccine for preventing disease in mammals infected by H.bizzozeronii.

This sequence encodes H. felis urease B. This sequence was used in the method of the invention for raising an immune response in an animal. The method comprises administering to the animal a composition comprising a carrier and an antigen bound to a targeting moiety which binds to a least one receptor present in circulatory vessels in Gut Associated Lymphoid Tissue (GALT). The method is useful for raising an immune response in an animal against antigens from Salmonella, Cholera, Helicobacter pylori, HIV, Candida, P. gingivalis, gut parasites, gut

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                        2883
